

Security Wall Files and Magazine Racks

Combine visual security with the attractive look of hand finished hardwood.

HIPAA Compliant

Magazine Racks

For Doctors, Dentists, Optometrists, Opticians and other health care providers that must maintain office systems that conform to HIPAA requirements.

Developed to ensure privacy of file data and comply with HIPAA requirements, our specially designed wall files also simplify handling of customer files in the office, examination room and anywhere visual security is required.

For office waiting rooms, common areas and general offices these magazine racks can be wall mounted or be left free standing. Whether used for magazines, forms or files, these semi-open front files are remarkably flexible!
